Frontend, AI/Python Workflow, and Full-Stack Developer

SUMMARY

Computer Science undergraduate building recruiter-ready web products with React, Spring Boot/FastAPI, Python automation, AI tooling, dashboards, and practical API integrations. Interested in frontend, full-stack, AI workflow, and freelance product builds.

CORE SKILLS

PROJECTS

Store Intelligence

React, Python, AI/ML, dashboards, APIs

- Dashboard and insight case focused on visible metrics, business signals, and AI/Python-backed analysis.
- Portfolio case page planned with screenshots, demo video, GitHub/live links, and FAQ.

WhatsApp Workflow Project

Python, APIs, webhooks, automation

- Automation case for leads, support, orders, or notifications.
- Designed to show trigger, backend route, workflow logic, and user-facing message flow.

Chit-Chat with Food System

React, Spring Boot, WebSockets, MySQL

- Real-time food ordering and chat workflow with responsive frontend and backend services.

VigilanceConnect

Python, BioBERT, Vertex AI, GCP, NLP

- AI-driven pharmacovigilance research framework with responsible NLP and safety-reporting context.

EXPERIENCE

Software Engineer Trainee - theprintSpace

Jun 2025 - Dec 2025

- Worked on web applications, API integration, debugging, deployment support, and frontend/backend collaboration.

Software Engineer Trainee - PrimeBeds

Jan 2025 - May 2025

- Worked on responsive UI, lifecycle work, repository management, requirements analysis, and implementation support.

EDUCATION

B.Tech Computer Science - University of Lucknow

Expected 2027

Sanitized resume preview: excludes full address, phone number, DOB, passport/private identifiers, and other unnecessary personal details.
